

SonarQube Report

The screenshot displays the SonarQube web interface in a browser window. The address bar shows 'localhost:9000/projects'. The interface includes a top navigation bar with tabs for 'Projects', 'Issues', 'Rules', 'Quality Profiles', 'Quality Gates', and 'Administration'. A search bar is present on the right. The main content area shows a list of projects, with 'Secure DevOps Pipeline' selected. This project is marked as 'Passed' with a green status bar. Below the status bar, a summary table provides key metrics:

Bugs	Vulnerabilities	Hotspots Reviewed	Code Smells	Coverage	Duplications	Lines
0 A	0 A	0.0% E	0 A	-	0.0%	7 XS Unknown

Additional filters on the left include 'Quality Gate' (Passed: 1, Failed: 0), 'Reliability' (A rating: 1, B-E ratings: 0), and 'Security' (A rating: 1, B-E ratings: 0). A yellow warning box at the bottom states: 'Embedded database should be used for evaluation purposes only. The embedded database will not scale, it will not support upgrading to newer versions of SonarQube, and there is no support for migrating your data out of it into a different database engine.'
